

Cottageville Public Service District Water System Lead and Copper Rule Questionnaire

.Per recent United States EPA changes to the Drinking Water Lead and Copper Rule, our water system is required to develop a service line inventory of all water pipe in our service area. This inventory would include the customers side from the meter to water taps in the home. The purpose of the rule is to identify any sources of lead to a customer's service tap and we are in need of your assistance to gather information on your side of the meter. Please help us by completing the following questionnaire and returning it to us by October 15, 2023.

Customer Name _____
Customer Account # _____
Customer Address _____

Year Home was Built _____

Is plumbing original from date of construction or been replaced at some point?
Please check appropriate box

Original	☐	Replaced	☐
----------	--------------------------	----------	--------------------------
